

17-01 Spreitzer vice with quick change jaws

Mechanical centre vice, type MZQ with reversible quick change jaws

The **centre-clamping vise series MZQ** with quick change jaws enables replacement of the jaws within seconds. They are designed specifically for use within pallet automation and for several times a day retooling the centre-clamping.

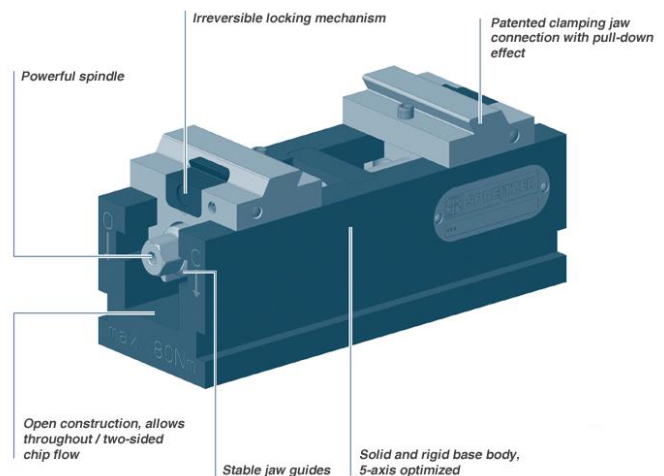

The reversible stepped jaws allow maximum accessibility even with short cutting tools. Due to the stepped form of the reversible top jaws, the complete clamping range can be covered.

mechanical precise vice, type MZQ
