

17-11 PN Spreitzer WPC measuring

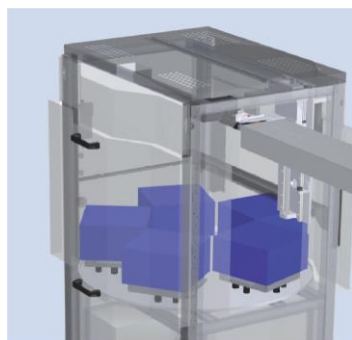

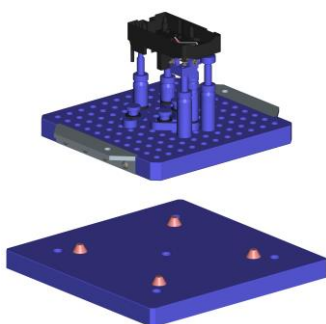

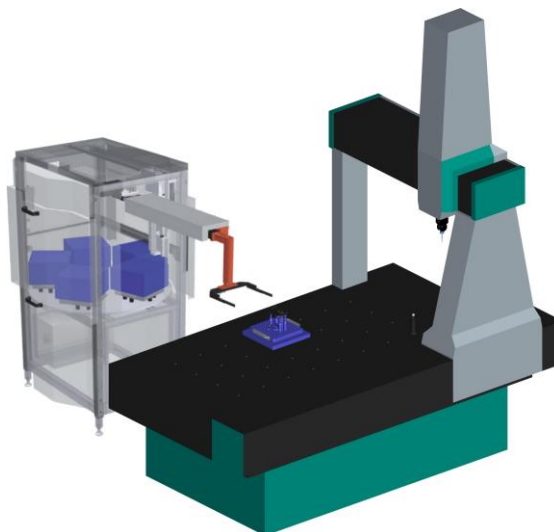

Pallet automation for WPC measuring

To reduce the set up time of the measuring machine to a minimum, the Alumess fixturing system is designed as a pallet system. The automatic pallet changer with minimal floor space requirement allows the automatic change from Alumess pallets to Alumess base on the machine table of the coordinate measuring machine.

The one-sided sliding door allows optimum access to the magazine which makes the loading and removal of the pallets easier.

Due to the simple installation no expensive machine modifications are required.

Magazine capacity:

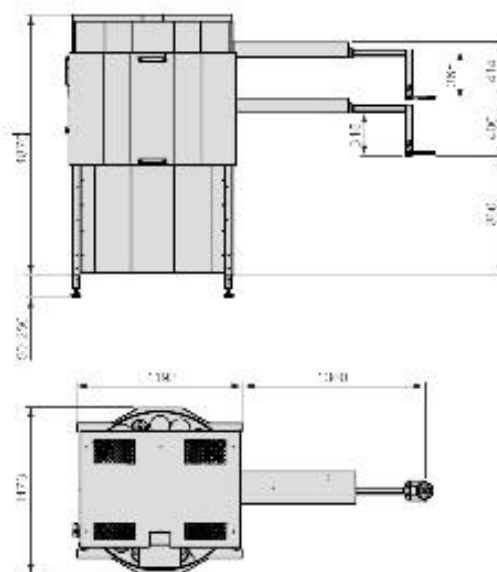

6 pallets 280x280mm, max. 50kg/Position
12 pallets 190x190mm, max. 30kg/Position

Options:

ID system with / without automatic scanning

Your benefit:

- Automatic measuring
- More effective hours measuring machine
- More productivity
- Return on investment
