

SYSTEM 3R WORKMASTER USED ROBOT

system 3R

CONFIGURATION FOR MILLING MACHINE

This WorkMaster robot cell from System 3R is in good condition. Since 2007, this WorkMaster is used in a workshop in Switzerland. The company is working in the medical industry and bought a linear cell. System 3R took back the robot. The robot served two milling machines with Fanuc control. Total magazine positions: 33 Magnum and 8 delphin positions.

CONFIGURATION

- WorkMaster 1250-150 (150 Kg transfer weight).
- Special HCP gripper on robot arm.
- Carousel magazine 4 levels (3x Magnum-1x Delphin).
- Half rack Delphin.
- Loading station for Delphin and Magnum.
- Fencing with 3 doors.
- Cellmanager with ID (new PC).
- Alarm server.
- First installation in 2007

PRICE

This robot is installed in our showroom and can be delivered in another configuration with more magazine or other tooling for example. The robot can be sold with a guaranty of 3 months (optional).

Total new price for this cell: € 212.000,00
